

Southern Spars Cape Town (PTY) Ltd.
22 Bolt avenue, Montauk Gardens, Cape Town

GC32 Forestay lashing specification

The lashing must be made with 6 loops SK99 4mm* – split even into each slot, 3 port 3 starboard.

Preloading cycling is **`critical'** to get the correct even loading between each lashing – cycles needs to be 0-20% 0- 40% 0-60% 0-80% of WL twice on each before 100% load can be applied with suitable Lubrication

Also suitable chafe protection is advised

* Based off 30mm pin in spline and approx. 25mm wide with R8 Rads on Customer supplied end fitting (no forestay end fitting reference supplied at time of calculation)
